

Roofer Job Description

Description of Position:

Covers roofs with roofing materials other than sheet metal, including composition built up roofs using asphalt or pitch, roofing felts and gravel; modified bitumen systems; or single ply roofing membranes including EPDM and PVC. Lays and adheres insulation in asphalt or by mechanically fastening with nails or screws and plates. Applies asphalt or pitch to roof using push or pull type felt machines or by mop. When applying modified bitumen to roof, mops hot asphalt or spreads adhesive mastic onto roof and imbeds the membrane or uses a propane torch to heat the bottom of the membrane and roll membrane onto roof as specified. When applying EPDM, PVC or other single ply membranes, rolls out the roofing membrane and seals the seams as specified by the manufacturer of the membrane. Cuts roofing materials to size. Cuts strips of flashing and fits into angles formed by walls, vents and intersecting roof surfaces.

In order to perform the duties of this position, the following skills and abilities are required:

1. The ability to climb and descend a 40 foot extension type ladder unassisted; the ability to work at heights in excess of 10 feet.
2. The ability to repeatedly lift and carry roofing materials daily such as: rolls of roofing felt weighing approximately 75 pounds each.
3. The ability to cut, hammer, fasten, mop; and otherwise work with roofing materials.
4. The ability to work in a variety of physical positions, including stooping, squatting, kneeling and crawling. Extensive use of arms and shoulders, gripping and safe use of small and large hand power tools.
5. The ability to perform basic math functions and follow written or verbal instructions and safety rules.

The foregoing description of duties for the above position and the abilities required perform these duties is intended to be representative but is by no means an exhaustive listing of such duties and abilities.
