THE PREFERRED PROCESS

- **SURVEY** the facility to determine which situations might affect your project.
- **ANALYZE** substrate types and conditions, accessibility, and level of preparation necessary to adequately protect items not to be coated.
- **EVALUATE** the project carefully and offer a competitive, formal estimate.
- **CONDUCT "PRE-JOB MEETINGS"** to ensure our production personnel are fully aware of the specifications, expectations, safety and personal requirements of each customer.
- **PROJECT FOLLOW-UP** to ensure every aspect of quality, design and performance has been met.
