

Thermal imaging is a valuable diagnostic tool for predictive maintenance. By detecting anomalies invisible to the naked eye, thermography allows corrective actions to be taken before electrical, mechanical, process equipment or roofing systems fail. Call us today at 1-800-783-8338 for your free inspection estimate.

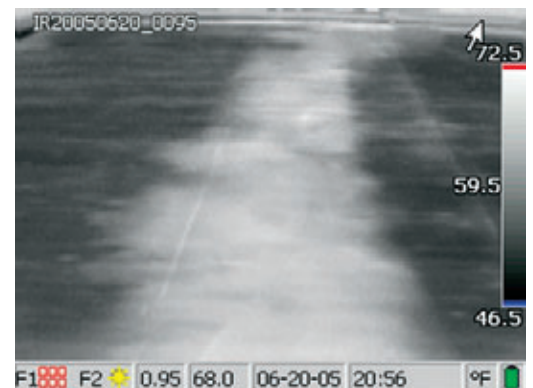

THE PREFERRED PROCESS

- **SURVEY** facility to determine and prioritize the systems that are crucial to the operation.
- **EVALUATE** the areas of inspection carefully to provide a competitive, formal estimate.
- **CONSULT** with involved personnel to determine your specific needs and requirements.
- **CONDUCT PRE-JOB MEETINGS** to ensure our inspectors are fully aware of the areas of inspection, safety and personnel requirements.
- **REPORT FOLLOW UP** to show areas that need attention before failure occurs.
